- Profit after net financial items totaled MSEK 117 (125) for the quarter and MSEK 225 (237) for the first six months of the year.
- Earnings per share amounted to SEK 2.95 (3.14) for the quarter and SEK 5.65 (5.94) for the first half of the year.
- Cash flow after capital expenditures totaled MSEK 93 (89) for the quarter and MSEK 91 (54) for the first six months of the year.
- Net debt amounted to MSEK 394 (402).
- Lesjöfors acquired the Asian spring manufacturer John While Group.

CEO's comments

The trend for the second quarter followed essentially the same pattern as the first quarter. While demand from industrial customers was in line with the corresponding period in the preceding year, sales of chassis springs declined compared with the record-breaking levels reported in the year-earlier period. Lesjöfors's acquisition of the Asian spring manufacturer John While Group, which generates annual revenues of MSEK 70, has been included in the Group since May and made a positive contribution to invoicing and earnings. The acquisition accounted for approximately 1 percent of growth. The Group's invoicing declined a total of 3 percent. Adjusted for acquired operations and fluctuations in exchange rates, invoicing fell 2 percent. Order bookings were in line with invoicing and the stock of orders remained largely unchanged during the quarter.

Profit after net financial items totaled MSEK 117, compared with MSEK 125 in the year-earlier period. All subsidiaries reported somewhat lower earnings compared with the year-earlier period. The operating margin declined slightly to 13.3 percent (13.9) despite the decrease in invoicing.

Cash flow after capital expenditures was impacted positively by a decline in tied-up working capital and amounted to MSEK 93 (89). Net debt for the first six months of the year totaled MSEK 394 (402). Cash flow and net debt were impacted negatively by acquisition payments totaling MSEK 40 during the quarter.

Lesjöfors

Lesjöfors's invoicing fell 2 percent to MSEK 541 during the second quarter. Acquisitions accounted for approximately 2 percent of growth. Adjusted for corporate acquisitions and fluctuations in exchange rates, invoicing declined 1 percent. The entire decrease was attributable to the Chassis Springs business area, which posted a 9 percent decline in invoicing year-on-year adjusted for fluctuations in exchange rates. In 2015, the business area reported high growth and record-breaking sales. The decline in the first half of this year was particularly notable in the markets that reported high growth in the preceding year, primarily the UK market.

Adjusted for acquisitions and fluctuations in exchange rates, sales of industrial springs increased 4 percent. The same trend was noted in all regions where Lesjöfors operates.

Operating profit amounted to MSEK 110, compared with MSEK 113 in the year earlier period, and the operating margin was largely unchanged.

Habia

Habia's invoicing fell 2 percent compared with the corresponding quarter in the preceding year and amounted to MSEK 169. Adjusted for fluctuations in exchange rates, invoicing increased 2 percent. Sales of cables to telecom customers rose 8 percent, while invoicing to other customer areas declined 1 percent during the quarter adjusted for fluctuations in exchange rates. The decrease in other customer areas was mainly attributable to low deliveries of nuclear power cables, which will be offset by larger planned deliveries during the coming months.

Order bookings exceeded invoicing and the stock of orders was higher than at the start of the quarter and compared with mid-year 2015.

Operating profit amounted to MSEK 16, compared with MSEK 18, and the operating margin was slightly lower than in the second quarter of the preceding year.

Beijer Tech

Beijer Tech's invoicing fell 8 percent to MSEK 189 during the second quarter. The entire decrease was attributable to the Industrial Products business area, while the Fluid Technology business area displayed growth and satisfactory profitability. Industrial Products was impacted adversely by the weak offshore market in Norway and low demand from customers in foundries and steelworks in the Nordic region.

Operating profit amounted to MSEK 5, compared with MSEK 7, and the operating margin declined compared with the year-earlier period.

Outlook

The global industrial economy will likely continue to be characterized by low growth going forward. It is also reasonable to expect demand for chassis springs to remain somewhat weaker in the coming quarters compared with the record-breaking levels reported in the preceding year.

Corporate acquisitions

Lesjöfors acquired the spring manufacturer John While Group (JWG), with production operations in Singapore, Thailand and China. The acquisition strengthens Lesjöfors's position in the emerging markets in Asia. JWG specializes in the manufacturing of customized springs. Its customers mainly operate in the home electronics, white goods, automotive and engineering industries and predominantly include European and US companies with operations in Asia. The company has 115 employees and reported revenues of approximately MSEK 70 for 2015 with favorable profitability.

Acquisition calculation

Purchase consideration, of which MSEK 57.5 paid in cash and the remainder to be paid within one year (Acquisition includes cash of MSEK 17.5)	MSEK 70.5
Acquired net assets measured at fair value	MSEK 48.7
Goodwill	MSEK 21.8

Goodwill was attributable to synergy effects within Lesjöfors and to inseparable customer relationships.

Net assets comprise:

The receivables guaranteed by the seller are assessed as having been transferred to fair value. Acquisition costs totaling a negligible amount were charged to net profit for the period.

Takeover occurred on May 1 and, since then, JWG has contributed MSEK 12 in invoicing and MSEK 1.1 in operating profit.

Events after the end of the period

No significant events occurred after the end of the period.

Risks and uncertainties

The Group's material risks and uncertainties include business and financial risks. Business risks may include major customer exposures to individual industries or companies. Financial risks primarily pertain to foreign currency risks that arise because more than 95 and 87 percent of sales for Habia and Lesjöfors, respectively, are conducted outside Sweden, while approximately 50 percent of production takes place outside Sweden. Beijer Tech does not have a corresponding foreign currency risk since about 70 percent of its sales are conducted in Sweden.

Management of the Group's financial risks is described in Note 30 of the 2015 Annual Report. The Group is deemed to have a favorable risk spread across industries and companies and the assessment is that the risk situation has remained unchanged during the year.

This interim report was prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted by the European Union (EU). The presentation of the interim report complies with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act.

No new or revised IFRS that took effect in 2016 had a significant impact on the Group. Accounting policies and terms of calculation are unchanged compared with those applied in the 2015 Annual Report. Significant accounting and valuation policies are found on pages 48-51 of the 2015 Annual Report.

The fair value of financial assets and liabilities is deemed to correspond to the carrying amount.

Use of performance measures not defined in IFRS

As of the second quarter, Beijer Alma has applied the European Securities and Markets Authority's (ESMA) new Guidelines on Alternative Performance Measures. In short, an alternative performance measure is a financial measure of historical or future financial performance, financial performance or cash flows that is not defined or specified in IFRS. Definitions of the performance measures used in this interim report are presented in the Annual Report for 2015.

Parent Company

The Parent Company, Beijer Alma AB, applies the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities. These accounting policies correspond with the preceding year and with the consolidated accounting policies where applicable.

The interim report comprises pages 1-13 and pages 1-4 are an integrated part of this financial report.

Review report on the condensed interim information (interim report) prepared in accordance with IAS 34 and Chapter 9 of the Swedish Annual Accounts Act

Introduction

We have reviewed the condensed interim financial information (interim report) of Beijer Alma AB (publ) as of June 30, 2016 and the six-month period then ended. The Board of Directors and the President are responsible for the preparation and presentation of the interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review has a different focus and a substantially more limited scope compared with the focus and scope of an audit conducted in accordance with the International Standards of Auditing (ISA) and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant circumstances that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Annual Accounts Act, regarding the Group, and with the Swedish Annual Accounts Act, regarding the Parent Company.
